

The Aston Defibrillator Fund
- *Serving the Farnham Community*

OUR MISSION

The three primary objectives of the ADF are:

1. The Purpose of the Aston Defibrillator Fund (ADF) is to 'oversee and support the maintenance, repair and replacement of existing PAD, or their accessories, and to expand the provision of PAD's within our community.'
2. To help the community to ensure a maintenance plan is in place for the monitoring of the PAD such that they are all available for use if needed by any member of the public.
3. To work with Farnham Town Council and the local press to compile, publish and update a list of all PAD in the area, thus raising awareness of the location of these life saving pieces of equipment.

Additionally we are able to offer a centre of competence for groups that raise funds to purchase their own PAD, giving our advice on location, cabinet security etc.

** PAD is a common abbreviation for a public access defibrillator*
